

T H E
Roads through England delineated
Or, Ogilby's Survey,

Revised, Improved, and Reduced to a Size portable for the Pocket

By John Senex F, R, S

Being an Actual Survey of all the Principal ROADS of
England, A N D Wales,

Distinctly laid down on one hundred & one Copper Plates on which are delineated all the
Cities, Towns, Villages, Hills, Rivers, Brooks Churches capital Seats, and every place worthy of

Note, throughout each ROAD;
W. S. T. H.

The addition of some Roads newly drawn, which were omitted by M^r. Ogilby, and several
necessary Corrections made in others: Together with a great number of explanatory references, by
which this Edition of the Roads is render'd of more general Use to TRAVELLERS.

Printed for John Bowles and Son at the Black Horse in Cornhill London 1757.

'80...2208

David H. Pratt,
Southampton.
Misc. purchase.

O GILBY's Survey of the Roads, has for many Years been highly esteemed by the public.

John Ogilby, Esq; Surveyor to King Charles II. was ordered by the King and Lords of his Council, to make a Survey of the chief Roads throughout England and Wales. Accordingly with proper Assistants, he employed indefatigable pains and many years in executing the work, and afterwards had it engraved on 100 large folio Copper-Plates. This Publication was very pompous, but the bulk of it in great measure defeated the usefulness which might be expected from a work of that kind: it was consulted at home by the curious, whose shelves were generally furnished therewith, but the size of that edition was too large for a Travelling Companion; whereas it is on the Road, and at baiting places on a Journey, that Travellers have the greatest service from such a performance.

On this account, the late ingenious Geographer Mr. John Senex, F. R. S. reduced the 100 large plates of Mr. Ogilby into the same number of small ones. By this means he made the Survey portable for the Pocket, and at the same time preserved with great perspicuity the particulars delineated in those larger plates, and likewise added several improvements as he thought convenient.

This neat edition of the Roads exhibited by Mr. Senex, has been lately revised, several necessary alterations have been made, and some Roads never before publish'd are drawn and added to it. A great number of useful references are now engrav'd, by which the Traveller is directed to the pages where the Roads branch from, or lead into one another. These references will assist him in forming many circuits round the country, and are so necessary in a work of this kind, it is astonishing that the first edition by Mr. Ogilby, and all the subsequent ones till now, should have appeared without them.

All the Direct Roads from London are comprised in 38 Itineraries, and 58 plates. Of these, the first fourteen are Direct Independent Roads, or such as are delineated with London at their commencement.

From plate 32 to 58 are contained the Direct Dependent Roads, or such as branch out from some of the former at a distance from London. The course of the Road to the place from whence a Dependent Road branches, being represented in a preceding plate, instead of needless repetitions, a reference is made to the page where the plan of the Road is laid down from London to that place. For example, the Road from London to Barnstable plate 32, commences at Andover, and refers to the Land's-End Road plate 25, where the Road from London to Andover is delineated.

The Cross Roads follow from page 59 to the end of the volume. These are Roads whose commencement is not at London, but beginning at some other principal town, lead cross the country to another town of note or traffic.

A Direct Road might sometimes be further extended into a Cross Road. For example, Gloucester being the direct way from London to Ross and Hereford, the Road to Gloucester plate 15, might be extended to Hereford in plate 78, where the Road is delineated from Gloucester through Ross and Hereford, as part of the Cross Road from Gloucester to Montgomery. So the Direct Road to Shrewsbury plate 53, might be extended to Wrexham in the Cross Road from Shrewsbury to Holywell plate 94. The general Map prefix, helps to discover many instances of this kind, and of some others, where the whole Road might be a direct continuation from London, as in plate 94, from Chester to Holywell. Plate 101, from York to Whitby. The double line = in the general Map shews the Direct Roads and their extensions.

The Roads are ranged into the aforementioned three Classes, and in each of them follow one another in alphabetical order. It is only in a very few instances this method is varied, by intermixing some Cross Roads among the Direct Roads, and the Traveller will find his convenience where this is done. Those Cross Roads always leading from a principal town in the Direct Road described on the same plate, to another town of eminence in the neighbouring country. As in plate 4, from Arundel to Chichester. Plate 52, from Southampton to Winchester, &c. The Roads from Chelmsford to Braintree and Sudbury, &c. plate 68, and from Canterbury to Sandwich plate 69, &c. are continuations of Direct Roads; but there being some Cross Roads likewise engraved on the same plates, they are placed in that class.

Each Road is supposed to be drawn on a long Roll, making several bendings backwards and forwards; on the forward returns of which the plan of the Road is drawn, beginning at the bottom at the left hand, and proceeding upwards to the top of the first bending, is then continued from the bottom of the next; and so along the Roll, from the top of one bend to the bottom of another till the Road is finished. By following the measured miles in their numerical order up the bends of the scrawl, this method will be understood at the first inspection.

The Roads are bounded by two parallel black lines = when hedged in on both sides. When a Road is open on both sides, as in crossing an heath or common, it is then described by parallel dotted points ::::: If bounded on one side and open on the other, the inclosure is delineated by a black
A line,

line, the open side by dotted points Every mile on the Road is terminated by a black dot between the parallel lines ; the figures opposite to the dot, shew the number of miles from the place where the mensuration began; which in all the Direct Roads from London, is from the end of Cornhil where Bishopgate-Street leads to the North; Gracious-Street to the South; Leadenhall-Street to the East; and Cornhil to the West.

Every measured mile is particularly set down on the side of the Road, even with the dots by which the measured distances are terminated, and the number of computed miles are inserted near all the noted cities or towns. As from London to Oxford measures 55 miles, and its computed distance is but 47. The direct horizontal distance of the town at the end of each Road, from the town at the beginning of it, is likewise set down, and by comparing it with the distance along the Road, the curious will see how many miles the Road winds in travelling to that place, and how much nearer it lies upon a straight line.

The plan of each Road is laid down in such a manner, that the Traveller before he begins his stage, may have the satisfaction of seeing in what places his journey leads over a plain; where he is to pass over hills; what rivers he must cross; how far his rout is through one county, and where he enters into another. The bearing of the Road is shewed him in each division, by the Flower de Lis, which is every where pointing to the North, and the other three strokes of the compass to the three other cardinal points. The little openings on either side of the Road, shew him the turnings to be avoided: and the names of the places they lead to are inserted for his information.

The Direct Road from London to any place of note, will easily be found by having recourse to the following Table: wherein are included many places on the Cross Roads, which the extension of a Direct Road would reach. As for example, Sunderland plate 97: Durham being the direct way to it, the Road plate 8, might be continued thither from Durham. Other examples of this kind have already been given, and more will be discovered in using the book.

Lately published by JOHN BOWLES and SON, at the Black Horse in Cornhil.

THE Counties of England and Wales, in 52 Maps, by Herman Moll. Price 10s.

The Shires of Scotland, in 36 Maps, by Herman Moll. Price 8s.

The Provinces and Counties of Ireland, in 20 Maps, by Herman Moll. Price 5s.

The three sets bound together make a *British Atlas*.

Atlas Minor: Or, Moll's small Atlas. Being a curious Set of sixty-two Maps, in which are shewn all the Empires, Kingdoms, Countries and States throughout the known Parts of the Earth; with their Bounds, Divisions, chief Cities, and Towns, laid down agreeable to Modern History. Price 17s. bound and coloured.

Templeman's Survey of the Globe. Or an accurate Mensuration (on the most correct Maps and Globes) of all the Empires, Kingdoms, States, principal Provinces and Islands in the World. The Area is given in square Miles, by which the Extent, Magnitude, and true Proportion that one Country bears to another, are minutely shewn.

The distant and separate Territories of every Prince and State are collected together, and the Area of their whole Dominions in square Miles is shewn in one View: Also the Area of each Province distinct, its length and breadth, the Longitude and Latitude of its principal Town, its distance from London and from the Metropolis of the Dominions it belongs to.

The Protestant Kingdoms and States are distinguished from the Roman Catholics, and a Comparison drawn between the Greatness and Extent of their several Dominions, the Difference ballanc'd and demonstrated.

The antient Persian and Roman Empires compared with the present Russian, Turkish and other great Empires.

The superficial Contents of the whole Globe is given in square Miles, and of each of the four quarters, also of the Habitable Earth, and of the Seas and unknown Parts.

A Collection of all the noted Sea-Ports in the World, an Account in what Country they are, to whom subject, their Longitude and Latitude, and Distance from the Port of London by Sea: Also the European Settlements and Factories in the East and West Indies, Africa, &c.

With political Notes, wherein the Number of People in all the principal Countries and Cities of Europe are calculated from the Number of Houses or Bills of Mortality. Price 10s.

N. B. These are the Tables so often referred to in the modern Systems of Geography. They supply the Lovers of that Science with Ideas of the Magnitude of Countries not attainable by the Inspection of Maps only. The whole is neatly engraved on Copper-plates the Size of Moll's Atlas Minor, and frequently bound therewith.

The World described: Or a Set of Maps of all the Kingdoms and States in the known Parts of the Earth, wherein the Errors of the antient Geographers are corrected according to the latest observations communicated to the Royal Society of London, and the Royal Academy of Paris, by Herman Moll. Price two Guineas.

Modern Geography: Or all the known Countries in the World laid down agreeable to the Observations and Discoveries communicated to the Royal Society of London and Academy of Paris, by John Senex, F. R. S. Price two Guineas.

Dufauet's Geography Epitomised. A useful and curious Performance. Engraved in a very neat Manner by James Cole on one Sheet. Price 2s.

An INDEX of all the Cities, Market-Towns, and many of the Villages situated on the Direct Roads, shewing their Distance from London in measured Miles, in what County they lie, and in what page they are laid down.

These Distances are measured from the Standard in Cornhill near to the Royal Exchange.

A TABLE of the CROSS ROADS.

Shewing in measured Miles and Furlongs the Distances from one Town to another on each of the Cross Roads, and the total Distance from the Town or City from whence the Road begins, to the Town at the End of it. The Figures in the First Column are the Pages in the Survey, where the Road is to be found. The Towns are in the Second Column: The Miles and Furlongs in the two others.

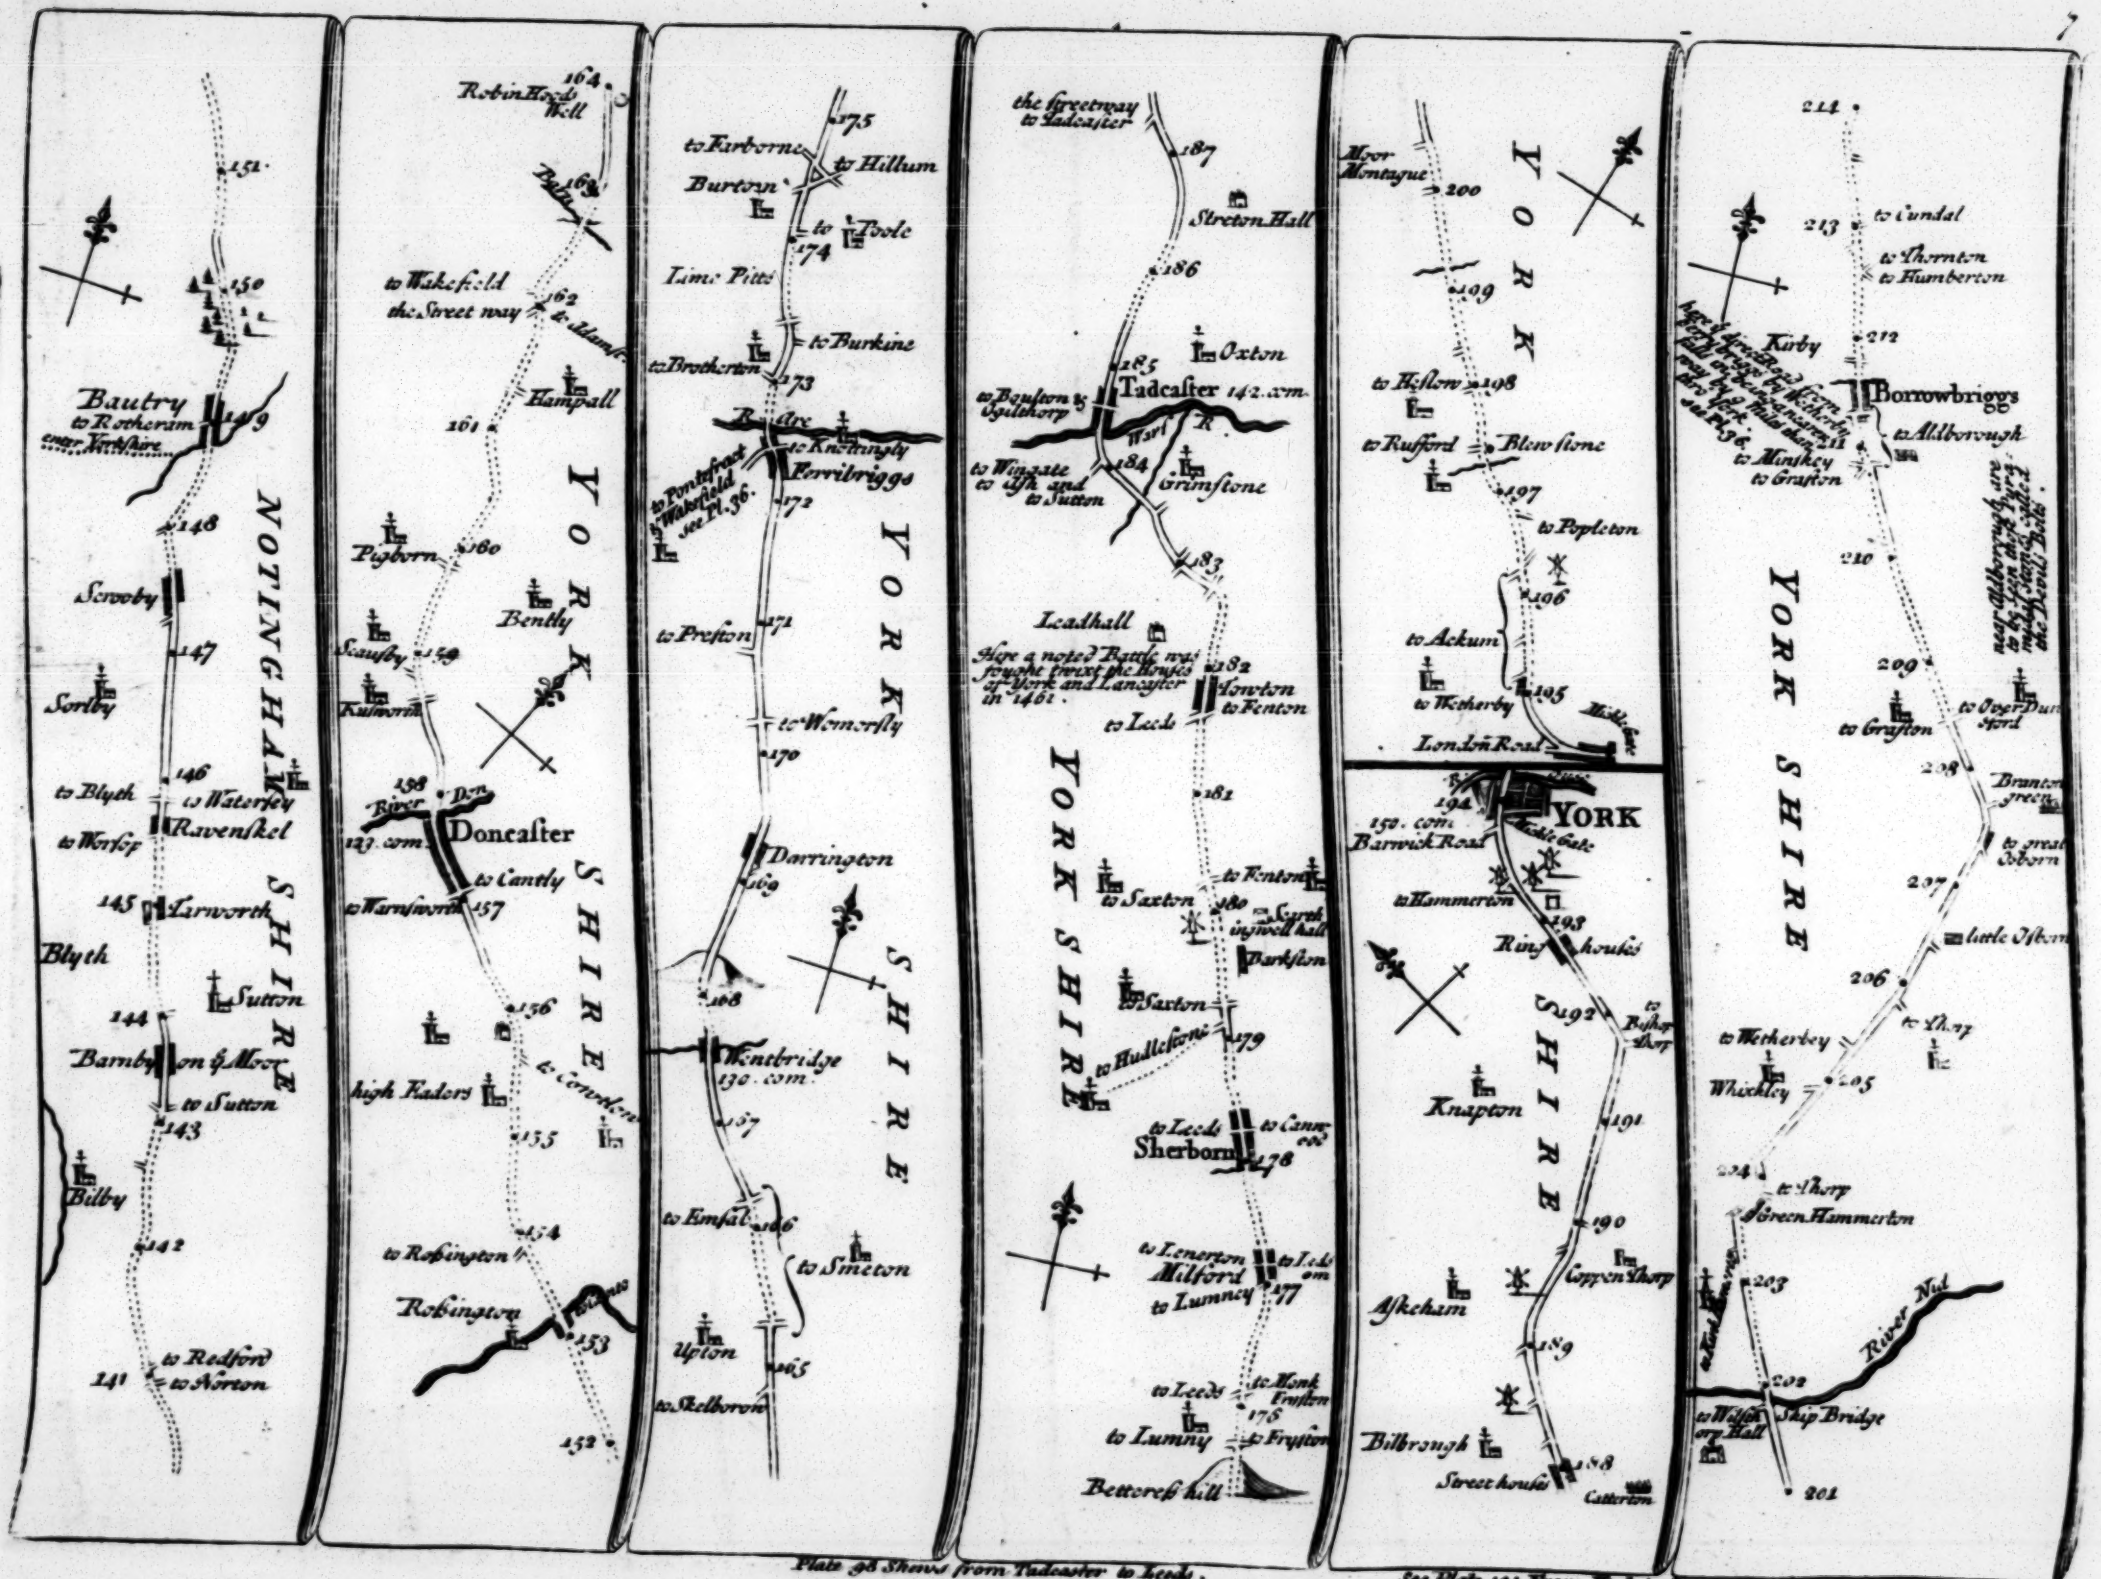

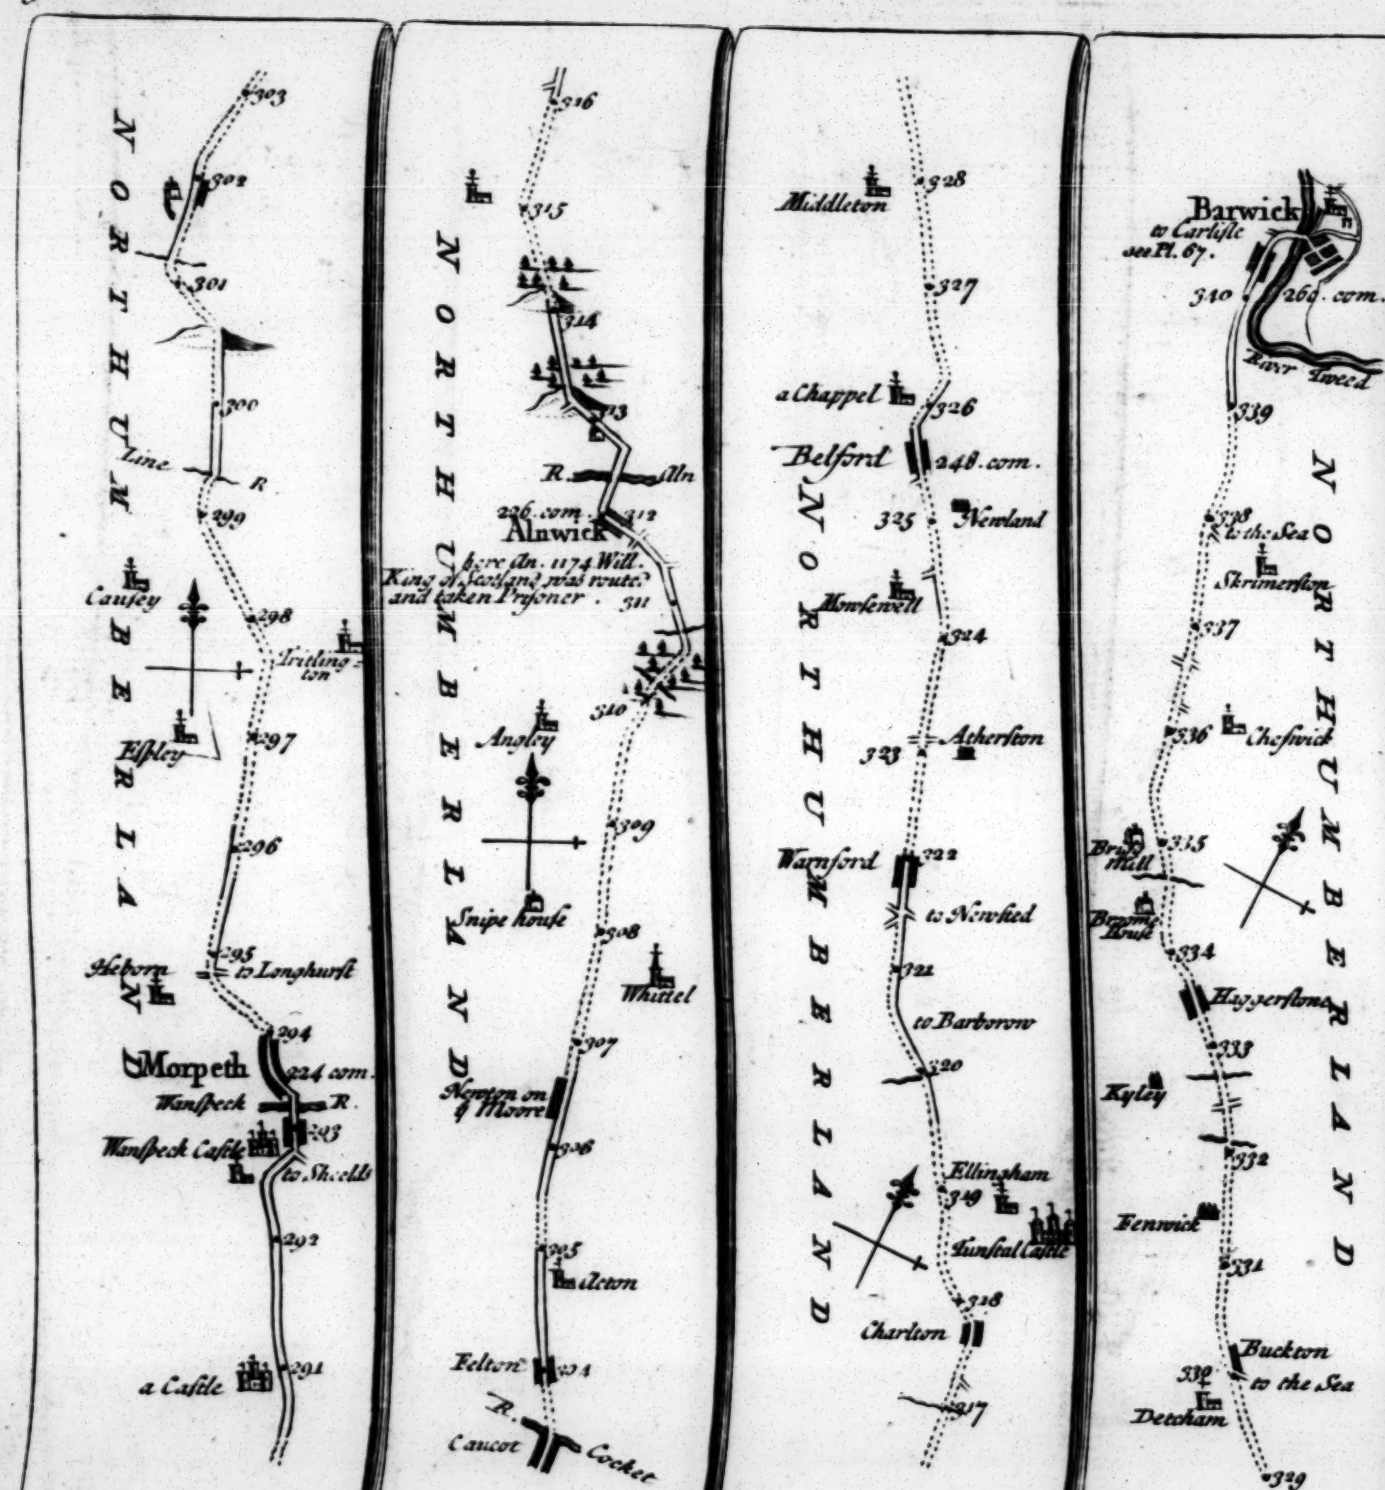

Plate 98 Shows from Tadcaster to Leeds.

See Plate 101 From York to Scarborough.

In the Index prefix to this book, the distances from London to places north of Boroughbridge are set down agreeable to this Road, but Plate 36 shews a nearer way to Boroughbridge.

The former Itinerary shews the great Northern Post Road through Enfield Wash, Ware, Royston, Caxton & Huntingdon.

The Stage Coach Road is through Barnet, Plate 21. Thence to Hatfield, Stevenage, Baldock, Biggleswade and Tempsford Plate 47 & thence in Plate 43 through Bugden to Aukbury Hill where the two Roads meet.

At the junction of the two Roads stands a Pillar with the following Inscriptions

To Huntingdon 5 Miles
To London through Huntingdon
Royston and Ware 64 miles.
To London through Huntingdon
Cambridge and Ware 72 miles
To Stilton 7 miles.

To London through Bugden
Biggleswade & Hatfield 68 miles
To Bugden 7 miles
To Ramsay 8 miles

A little beyond Barnet Plate 21 at the Place where the Northern Stage Coach Road turns off to Hatfield was erected 1740 a handsome Stone Pillar with the Inscriptions as underneath
To Hatfield 7 miles $\frac{3}{4}$
From St Albans 8 miles $\frac{3}{4}$
Here was fought the famous Battle between Edward the 4th and the Earl of Warwick April 24 Anno 1471.
In which the Earl was defeated and slain.

The direct Horizontal distance of Berwick from London is 296 Miles.

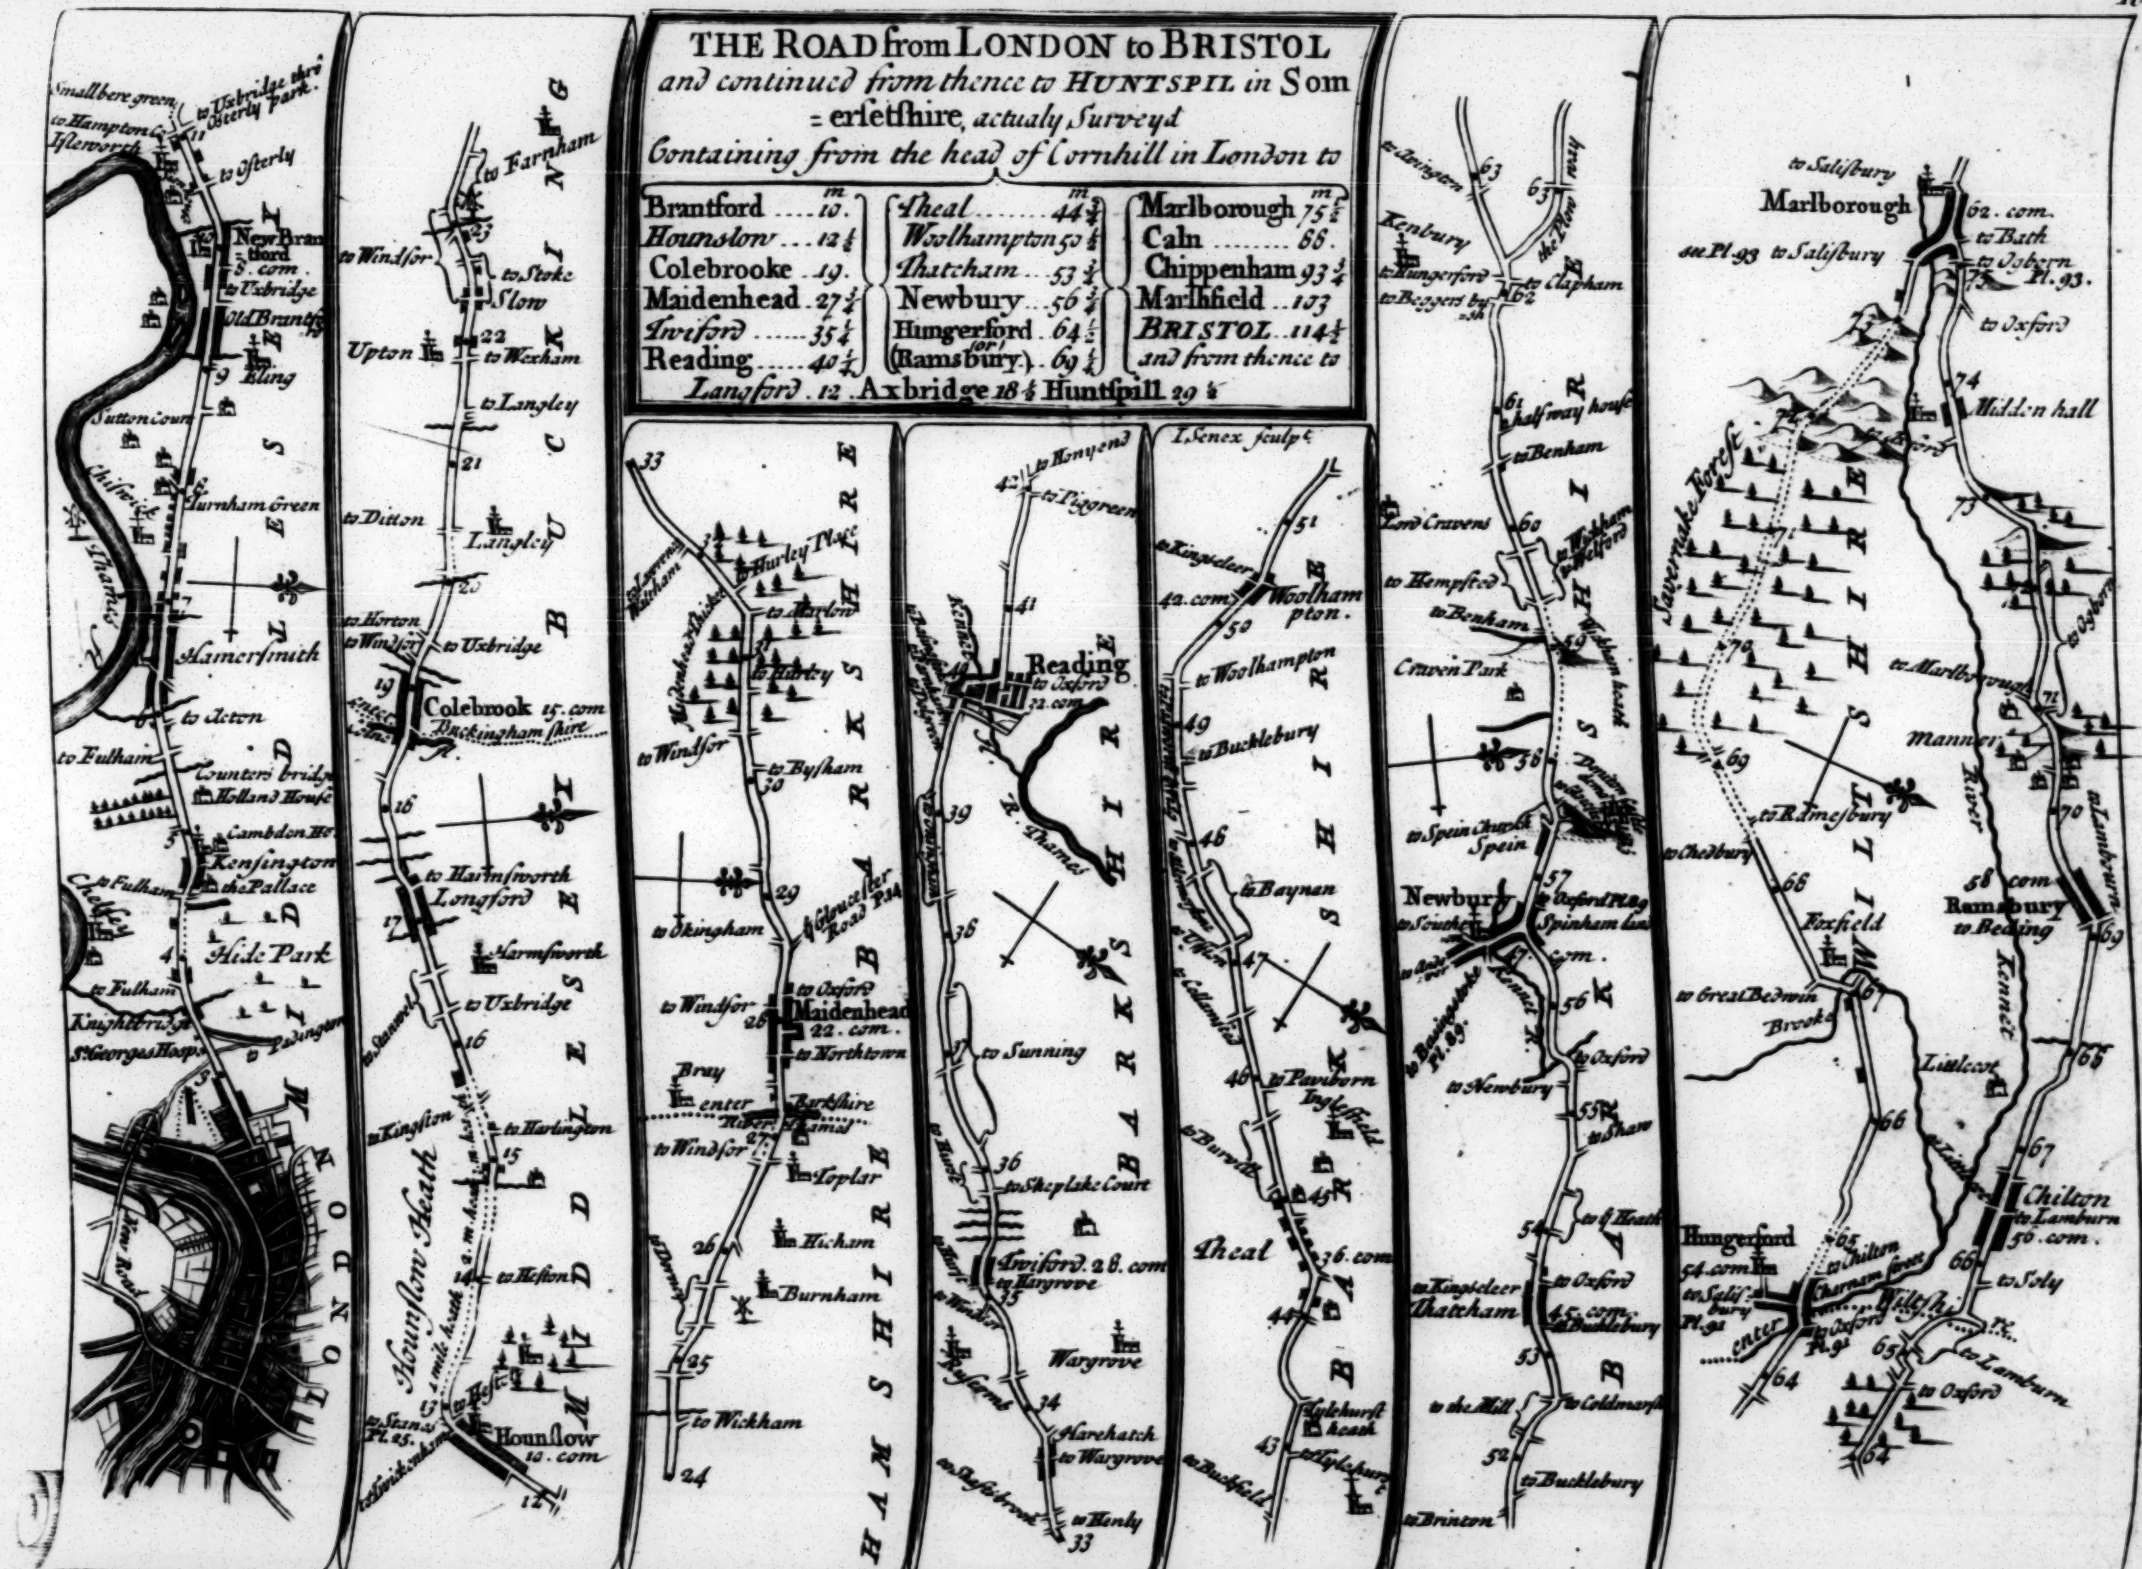

Its measured distance through Huntingdon and York is 341 Miles.

Its measured distance through Huntingdon and Wetherby 332 Miles.

Its measured distance through Hatfield is 4 Miles more
